**Categories:** Pogo FOIA

Sorry, I think I disagree, I thought that since they put so much detail in their request about proposed limits and averaging time, that it would be very important to be clear that we have not committed to any of that by approving the request, that all limits and time periods would be established after we saw results of the test. I tried to be very explicit about that throughout, and just walk through the requirements of the rule to show that the petition request was satisfied.

I was thinking something along the same lines; I think the approval itself can be rather brief and the analysis can go into a support document. A lot of what they've provided will be used for the later decision making, but isn't critical to this approval.

Are you okay w/ that Heather? If so, I will give you some suggestions on an edited-down version.

Heather,

One initial question for you and Shirin...Instead of including all this detail, would it be ok if our petition approval just approved the petition as submitted and called out any differences or changes we need? This approach just seems cleaner to me...

Thoughts?

Hi Shirin, How are you. I have a draft ready for you to review for the response to the petition. Please set aside any of the other things you are working on for me so we can get this out asap.

I switched my flexiplace days to Monday and Thursday, so call my cell to discuss 206-300-7282

Zach, you could take a look too and let me know if you have any feedback.

Thanks!!
